Hello, team!

Hope you're all doing well.

As discussed, we've implemented a new functionality in the [products spreadsheet](#) to streamline data filtering and reporting. This enhancement aims to save time and make it easier to track past filters and results.

To better understand its capabilities and learn how to use the solution, feel free to watch [this tutorial video](#) we've prepared.

You can access and start using the solution [\[here\]](#).

We're open to any suggestions or questions you may have.

Best regards,
Rafael Bianco.
